

BUILDING LOGS

WE START WITH HUGE WINTER CUT LOGS
THE LOGS ARE SQUARED ON OUR TIMBERKING SAWMILL
THE SQUARED LOGS ARE STACKED AND SEASONED FOR A YEAR
WHEN WE ARE READY TO USE THEM THE DRY TIMBERS ARE
RUN THROUGH A GIANT LATHE CAPABLE OF PRODUCING A
UNIFORM ROUND LOG UP TO A 14 INCH DIAMETER AND 28 FEET LONG
THEY CAN BE USED LIKE THIS OR WE CAN PRODUCE DIFFERENT PROFILES

WE CAN SAW TIMBERS UP TO 40 FEET ON
OUR FULLY HYDRAULIC TIMBERKING BANDSAW
(GREAT SAW AND COMPANY)

THE DRY CANTS AREN'T PRETTY
BUT THEY MAKE GREAT LOOKING LOGS
BESIDES BEING AIR DRIED THE OTHER
ADVANTAGE OF DRYING IS THAT WE CAN
SEE THE GRAIN AND ANY DEFECTS
AND REJECT UNSATISFACTORY LOGS

WE ALSO SORT OUT LOGS
THAT ARE SUITED TO
FULL SCRIBE HAND PEELED
LOG CONSTRUCTION
WE MAY HAVE SOME FOR
SALE WITH 10 TO 12 INCH TOPS
AT 40 FEET
